

Elastic Webbing Suspensions

Matrex' extensive line of elastic webbing products is the result of research projects that involve application analyses, ergonomic considerations, and test evaluations that determine fatigue ratios. The result of this effort is that the comfort and durability of the Matrex Elastic Webbing are the quality seating standard for high-end household and institutional furniture. We encourage our customers to utilize our resources and data banks in selecting the best webbing system for their application.

Matrex is the exclusive representative for Intes Webbing in North America. The Intes line provides an extensive group of strip rubber webbings, many of which have been utilized by the industry for over forty years.
