

# Sytex™

Sytex is available just in time, with immediate technical assistance to help you customize your application and optimize the comfort of your seating.

Type	Width	Package	Applications
Sytex I	2"-30"	150-1500 ft.	Deep, soft ride
Sytex II	2"-30"	150-1500 ft.	Medium resiliency seating
Sytex III	2"-30"	150-1500 ft.	High traffic firm seating
Synet	15"-28"	150-1500 ft.	Backs-hand applied

Developed and manufactured in the USA by Matrex, the Sytex Group of seating support systems is based on the unique elastomeric properties of a high strength polyester monofilament. Its outstanding features include:

- **Sytex** is unaffected by fungus, urine, mildew and household cleaners.
- **Sytex** is easy and safe to apply, and reduces frame stress.
- **Sytex** can be adjusted easily to obtain a firm seat or a deep, plush ride.
- **Sytex** seating support systems surpass the requirements of all government and business technical specifications, including FNE-83 258-B and BIFMA.

Due to the low elongation requirements of the product, Sytex is simple to apply by hand. However, machines that are specifically designed to apply this material in a safe, efficient manner are available for customers with specific requirements.
